

COURSE OVERVIEW

This certificate forms the foundation for correct skin analysis and selection of dermal therapy procedures within a cosmetic medical context. Lectures focus on skin physiology, the presentation and pathophysiology of dermatologic disorders, repair abilities and wound management. On completion of this certificate, students should be able to identify a range of dermatologic and cosmetic skin conditions in order to work within their scope of practice or refer to other medical professionals. The dermatoscopy section of the course requires the student to identify and examine a series of skin lesion slides to provide a holistic approach to dermal practice.

Course Fee

\$880.00 (Inc. GST)

Course Duration & Study Commitment

The certificate is delivered over 10 weeks requiring a minimum 3 to 4 hrs of study per week, though can be fast-tracked if time allows.

Study Modes Available

This course is delivered online in a flexible, self-paced mode.

Course Start

Monthly Intakes

Pre-requisites / Entry Requirements

There are no pre-requisites to apply for this course, however this course is most suited for those working in a dermal and/or health setting.

LEARNING OUTCOMES

- Explain the structure and function of skin
- Analyse factors associated with skin ageing and common dermatologic disorders
- Discuss the principles of skin healing and wound care
- Discuss the aetiology of skin cancer
- Apply principles of dermatoscopy to patient assessment

FURTHER LEARNING PATHWAYS

Successful completion of this certificate allows for credit (theory only) in the following nationally accredited qualifications:

52854WA Graduate Diploma of Dermal Science
52852WA Graduate Diploma of Cosmetic Nursing and Injectables
